

CHAITANYA KHANDARE

Software Engineering Intern Candidate | Linux • Backend Systems • Open Source
chaitanykhandare789@gmail.com • +91 96239 89644 • Pune, India • [LinkedIn](#) • [GitHub](#)

ABOUT ME

Final-year Computer Science and Business Systems student with a strong foundation in software engineering and hands-on experience building backend systems on Linux. Comfortable working in open, collaborative environments, debugging real issues, and picking up new languages and tools as needed. Passionate about how systems work internally, curious about open-source software, and eager to contribute to real product engineering while learning from an experienced team.

TECHNICAL SKILLS

Languages: Java, Python (basics), SQL

Operating Systems: Linux (daily development environment), Windows

Backend Development: Spring Boot, REST APIs, concurrent systems design

Tools: Git, GitHub, Docker, Maven

Databases: MySQL, PostgreSQL

Core CS: Data Structures & Algorithms, OOP, DBMS, Computer Networks, Agile methodology

EXPERIENCE

Java Full Stack Developer — Virtual Intern | [EduSkills Academy \(AICTE\)](#) | Remote | Oct 2025 – Dec 2025

- Completed a 10-week AICTE-certified virtual internship building enterprise web applications with the Java Spring Boot ecosystem.
- Developed and tested RESTful backend components following REST API design best practices, including proper HTTP status codes, request validation, and structured error handling.
- Gained practical experience in backend architecture patterns, Spring Data JPA for database integration, and enterprise development workflows.

PROJECTS

System Reliability Monitoring Platform — Java, Spring Boot, Linux, Docker, REST APIs, PostgreSQL

- Built a real-time monitoring platform to collect Linux system metrics (CPU, memory, disk, network) and analyze logs to proactively detect issues, developed and tested entirely on Linux.
- Developed a rule-based alerting engine exposing REST APIs for system health checks, incident tracking, and historical reporting.
- Containerized the application with Docker and deployed it to a live Linux server, debugging deployment and concurrency issues directly on the OS.

Factory Backend Event Ingestion & Analytics System — Java, Spring Boot, REST APIs, MySQL

- Built a backend system for batch ingestion and processing of machine-generated factory events using Spring Boot and MySQL.
- Implemented validation, deduplication, and concurrent event handling using ConcurrentHashMap and Spring Data JPA.
- Designed analytics REST APIs for event counts, defect metrics, and machine health monitoring; benchmarked with 1000+ simulated events.

EDUCATION

Bachelor of Technology, Computer Science and Business Systems — CGPA: 8.35 / 10

JSPM's Rajarshi Shahu College of Engineering, Pune | 2023 – 2027 (Final Year)

HSC (12th) — 64.33%

Shri Datta College of Science, Arts and Commerce, Hadgaon | Maharashtra State Board | 2023

SSC (10th) — 92%

Vivekanand High School, Hadgaon | Maharashtra State Board | 2021

CERTIFICATIONS

- Cisco Networking Basics — Cisco Networking Academy (2026)
- Data Structures & Algorithms with Java — Apna College (2024)

ACHIEVEMENTS

Competitive Programming — **LeetCode:** Solved 200+ problems covering Arrays, Strings, Linked Lists, Trees, Dynamic Programming, and Graphs; consistently practising to strengthen problem-solving speed and accuracy for technical assessments.

Educational Content Creator — **YouTube:** Built and managed an educational channel focused on exam preparation, producing predicted question papers and study resources; generated approximately \$500 in monetized revenue through consistent content creation.
