ABOUT ME

Final-year Computer Science and Business Systems student with hands-on experience building concurrent, backend systems in Java and Spring Boot, and growing proficiency in Python. Curious by nature about how distributed systems achieve scale, resiliency, and low latency, with personal projects exploring concurrent event processing and real-time system monitoring. Comfortable picking up new languages and tools quickly, contributing in Agile/code-review workflows, and shipping working software independently. Eager to take ownership of real features as a Software Engineer Intern and learn fast alongside experienced engineers.

TECHNICAL SKILLS

Languages: Java, Python, SQL

Backend: Spring Boot, REST APIs

Operating Systems: Linux (daily development environment), Windows

Tools: Git, GitHub, Docker, Maven

Databases: MySQL, PostgreSQL

Core CS: Data Structures & Algorithms, OOP, DBMS, Agile methodology

Emerging Tech: Familiarity with Gen AI concepts, RAG (Retrieval-Augmented Generation), and MCP (Model Context Protocol)

PROJECTS

DiagniAI — AI-Assisted Chest X-Ray Triage System — *Capstone Project | Java, Spring Boot, Python, FastAPI, PyTorch, DenseNet121, MySQL, JWT, REST API, Grad-CAM*

- Developed Spring Boot backend with REST APIs, MySQL integration, patient/case management, and business logic.
- Implemented JWT authentication and RBAC for Patient, Nurse, and Doctor roles.
- Integrated Spring Boot with a FastAPI DenseNet121 ML service for TB probability prediction and case prioritization.
- Integrated Grad-CAM explainability into the doctor dashboard for visualizing regions contributing to model predictions.

Factory Backend Event Ingestion & Analytics System — *Java, Spring Boot, REST APIs, MySQL*

- Built a backend system for batch ingestion and real-time processing of machine-generated factory events using Spring Boot and MySQL.
- Implemented validation, deduplication, and thread-safe concurrent event handling using ConcurrentHashMap and Spring Data JPA to maintain correctness under high-throughput load.
- Designed analytics REST APIs for event counts, defect metrics, and machine health monitoring; benchmarked with 1000+ simulated events to evaluate performance at scale.

EDUCATION

Bachelor of Technology, Computer Science and Business Systems — CGPA: 8.35 / 10

JSPM's Rajarshi Shahu College of Engineering, Pune | 2023 – 2027 (Final Year)

HSC (12th) — 64.33%

Shri Datta College of Science, Arts and Commerce, Hadgaon | Maharashtra State Board | 2023

SSC (10th) — 92%

Vivekanand High School, Hadgaon | Maharashtra State Board | 2021

CERTIFICATIONS

- Artificial Intelligence Fundamentals — IBM SkillsBuild (2025)
- Data Structures & Algorithms with Java — Apna College (2024)

ACHIEVEMENTS

Competitive Programming — **LeetCode:** Solved 200+ problems covering Arrays, Strings, Linked Lists, Trees, Dynamic Programming, and Graphs; consistently practising to strengthen problem-solving speed and accuracy for technical assessments.

Educational Content Creator — **YouTube:** Built and managed an educational channel focused on exam preparation, producing predicted question papers and study resources; generated approximately \$500 in monetized revenue through consistent content creation.
